EDUCATION

M.S. in Urban Spatial Analytics

Aug 2025 – May 2026

University of Pennsylvania — Philadelphia, USA

- Relevant coursework: Statistics & Data Mining | Python for Geospatial | Urban Sustainability AI | Remote Sensing & ML | Behavioral & Network Science
- GPA: 3.93 / 4.0 (Top 5%)

B.A. in Geography (Social Data Science)

Sep 2022 – Jun 2025

University College London — London, UK

- Relevant coursework: Data Analysis | Geocomputation | Cartography & Data Visualization | Applied Machine Learning
- Awarded Second Class Honours, Upper Division (2:1)

Erasmus Exchange — B.A. Geography & Planning

Sep 2024 – Dec 2024

University of Amsterdam — Amsterdam, Netherlands

EXPERIENCE

Research Assistant

Feb 2026 – May 2026

University of Pennsylvania — Philadelphia, USA

- Designed and implemented a 4-stage Multi-Agent scraping pipeline (OSM venue discovery → homepage navigation → event-page extraction → Perplexity fallback) covering 1,600+ libraries, museums, and arts centers across Pennsylvania to automatically collect event time, location, and type data.
- Built a SQLite-backed adaptive memory system maintaining an independent Playbook per venue (known event-page URLs, scraping strategies, failure logs), combined with EMA quality feedback and a priority-scheduling algorithm (days overdue × yield × venue weight) enabling continuous self-optimization without human intervention.
- Developed a rule-engine Judge Agent to score (0–1) and adjudicate (accept / review / reject) extraction results, and built a knowledge-graph module supporting cross-venue programming-profile analysis and similar-venue discovery via regex tag extraction and Jaccard similarity.

Sales Assistant

Jul 2024 – Aug 2024

Hisense Cold Chain — Qingdao, China

- Systematically organized and analyzed hundreds of WeChat customer feedback entries using keyword categorization and text structuring to surface high-frequency needs and common pain points for the sales team.
- Verified and modeled tender cost data in Excel, assisted in estimating competitive bid price ranges to support quotation decisions.
- Participated end-to-end in tendering projects, handling data organization and visualization, bid-document writing, and presentation preparation.

IELTS Teaching Assistant

Jul 2023 – Sep 2023

New Oriental Future Abroad — Hefei, China

- Led IELTS speaking practice sessions, providing targeted feedback on fluency, pronunciation, and coherence.
- Organized vocabulary quizzes and graded mock IELTS papers with detailed written feedback.

PROJECTS

Data Classification System for Architectural Practice

Jan 2026 – Present

Henning Larsen — Philadelphia, USA / Copenhagen, Denmark

- Designed and deployed a 4-layer LLM classification pipeline (routing extraction → 7-dimensional classification → design-influence scoring → risk review) to fully automate classification of 500+ unstructured architectural documents from large-scale urban planning projects such as Faelledby.
- Implemented two RAG modes: folder-sibling RAG for context recall from adjacent files, and project intelligence RAG for extracting open design decisions from meeting minutes, enhancing project-context awareness.
- Designed a dynamic VLM Agent Gate that automatically determines whether to activate the vision model based on pre-screening signals, reducing unnecessary API calls while maintaining accuracy.

- Built a design-influence scoring model (0–100) using a 4-dimensional geometric mean covering constraint rigidity, decision-chain position, phase alignment, and substitutability, quantifying each document's strategic impact on active design decisions to drive Review Queue prioritization.
- Integrated multiple LLMs/VLMs via OpenRouter with 10-way parallel processing; supports incremental mode and conditional selective re-runs for production efficiency and iteration flexibility.

SKILLS

Programming: Python, R, SQL, JavaScript, HTML/CSS

AI & LLM Engineering: LLM Integration, OpenAI API, LangChain, Agentic Modeling, Agent-Based Simulation, Hugging Face, OpenRouter, PyTorch, Deep Learning

Data Analysis: Linear & Logistic Regression, Clustering (K-Means, DBSCAN), Time Series Analysis, Spatial Statistics, Survey & Census Data Analysis, Data Taxonomy & Classification

Web & Scraping: Web Scraping & Crawling (BeautifulSoup, Selenium, Multi-Agent Pipelines), Front-End Development, Back-End Development, Web Design

Geospatial: ArcGIS Pro, GeoPandas, Spatial Data Infrastructure (SDI), GPU Computing (CUDA), GPS Data Processing

Visualization: Matplotlib, Plotly, Quarto, Cartographic Design

Dev Tools: Git / GitHub, Jupyter, VS Code, SQLite

Languages: English (Professional), Mandarin Chinese (Native)

PUBLICATION

A Data Taxonomy for Bringing Data into Architectural and Planning Decisions

Co-authored with Nitsan Bartov.
